# MOTION SENSOR SLIM LED LIGHT

Low-power integrated chip and microprogrammed control unit accurate algorithm, using infrared human body sensing with light sensing.

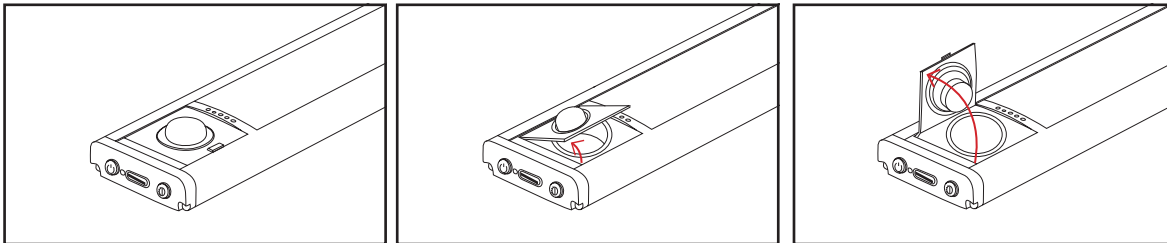

## Product Overview

### AVOIDANCE PRECAUTIONS

- Wet conditions (rain, damp umbrella cover)
- Unattended in high humidity
- Do not charge for more than 12 hours.

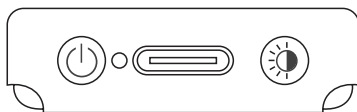

Induction head can be adjusted from 0°- 90°

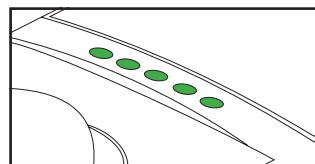

## Features and Technical

- The inductor will not trigger the LED light if there is ambient light (Daytime).
- MCU control, multiple functions and settings, multi-mode switching between induction trigger light/ induction without light control/constant light.
- DC5V / 3W / **4400mAh** Lithium Battery (28hrs at low power / 12hrs Full Power)
- **5000K** LED Light at 320 lumens (Full Power)
- **17.25" L x 1.5" W x .5" H**

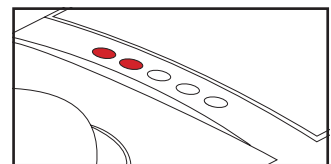

## Settings and Functions

### NIGHT MODE/FULL CHARGE

### DAY MODE/CHARGING

Long Press 3 sec.

S-1

**ON/OFF**

Press 1 sec.

S-1

- Motion and ambient light sensor setting is on.
- Motion sensor only.
- Continuous

Long Press 3 sec.

S-2

**Brightness adjustment.**
